

Listing of Claims

The following Listing of Claims replaces all prior versions and listings of claims in the application.

Please amend claims 1 and 14 as follows:

Claim 1 (Currently Amended): Support garment comprising an elastically extensible body part including a front panel configured for exerting a pressure on an abdominal region of a wearer, ~~and~~ a back panel opposite the front panel, and a crotch part interconnected between the front panel and the back panel, the support garment including a seam connecting the back panel and the crotch part to provide a pouch extending from a back portion of the support garment; ~~wherein the pouch that~~ provides a baggy crotch zone for the wearer;

wherein the seam connecting the back panel and the crotch part intersects a leg opening of the support garment such that the seam is spaced away from a lowermost edge and an uppermost edge of the leg opening.

Claim 2 (Previously Presented): Support garment according to claim 1 wherein a radius of curvature of a curved edge of the crotch part at the seam is smaller than a radius of curvature of a curved edge of the back panel of the body part at the seam.

Claim 3 (Previously Presented): Support garment according to claim 2, wherein the body part includes a waistband and the curved edge of the crotch part is convex relative to the waistband.

Claim 4 (Previously Presented): Support garment according to claim 1 wherein the front panel is configured to exert pressure on the abdominal region of between 15-50 mmHg.

Claim 5 – Claim 11 (Cancelled)

Claim 12 (Previously Presented): Support garment according to claim 1 wherein the front panel defines a hole configured to receive a stoma of the wearer.

Claim 13 (Previously Presented) Support garment according to claim 1 wherein the seam comprises a curved edge of the crotch part attached to a curved edge of the back panel, and further wherein a radius of curvature of the curved edge of the crotch part is different from a radius of curvature of the curved edge of the back panel to provide a baggy zone that extends from the back portion of the support garment.

Claim 14 (Currently Amended) A support garment comprising:
an elastic body part including a front panel configured to exert a pressure on an abdominal region of a wearer and a back panel opposite the front panel;
a crotch part interconnected between the front panel and the back panel; and
a seam connecting the back panel and the crotch part, the seam formed from a curved edge of the crotch part attached to a curved edge of the back panel;
wherein a radius of curvature of the curved edge of the crotch part is different from a radius of curvature of the curved edge of the back panel to provide a pouch extending from a back portion of the support garment; and
wherein the seam connecting the back panel and the crotch part intersects a leg opening of the support garment such that the seam is spaced away from a lowermost edge and an uppermost edge of the leg opening.
